

We listen to a nationally broadcast radio station called K-Love. I understand that there is a possibility that this station may be displaced by a LPFM station. This would be a tragedy. K-Love offers christian music and possitive stories that are difficult to find any where else. I provides a safe listening environment for my children where the will not hear sex and violence like they do in other media. Also, I find that more and more of my neighbors and friends are finding this station all the time and continue to listen for the same reasons that I do. I hope that these comments and others like it will be considered before displacing with the LPFM stations. Thank You for your time
